

BitSTACK | #1 | MAY 2024

---

## Welcome

Thank you for subscribing to the BitSTACK newsletter and welcome to the first of many. Everyone here at BitSTACK cannot wait to share our ideas with you and take in yours, turning your dreams and ideas into a reality.

---

## Meet the BitSTACK Team

Hannah Thompson | Co-Founder

I am the social media, packaging and marketing lead along with a background in education. My job is to keep social media up-to-date and oversee getting our products into the public. I also design our packaging and connect with schools. I can't wait to see where this company goes and to share our experience with you all.

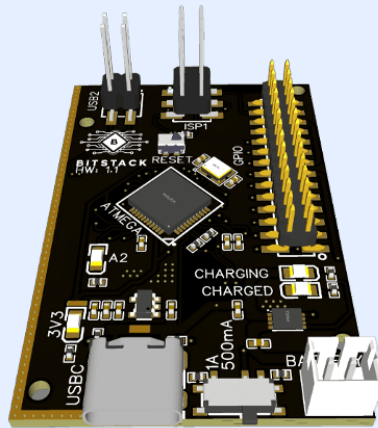

Oliver Cole | Co-Founder

I am the electronics lead. My job is to design and create new products, which is something I have been doing for over 6 years. Along with developing the electronics, I have experience in business management, allowing me to help Hannah with the day-to-day running of the business. I am excited to be involved with BitSTACK and looking forward to seeing your ideas.

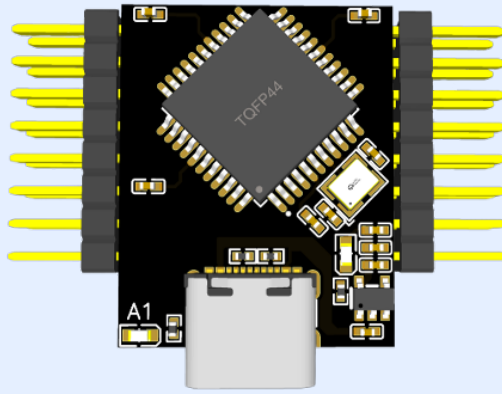

---

## Our Current Projects

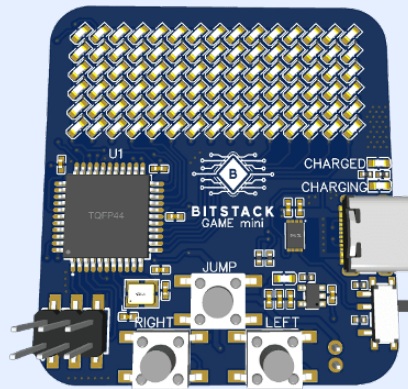

BitSTACK Pro

The BitSTACK Pro is a programmable microcontroller board that allows you to interact with hardware and modules developed by BitSTACK and third parties, in an easy and digestible way. Whether this be plugging in speakers and controlling them through code, to wherever your mind takes you. The BitSTACK Pro can be anything you want it to. It even includes a battery charger so you can charge it on the go to continue your creations wherever you are.

BitSTACK Micro

The BitSTACK Micro is just the same as the BitSTACK Pro, just in a smaller PCB and without the battery charger, The BitSTACK Micro is great for learners who want to experience code and microcontrollers in a smaller package.

BitSTACK Game

The BitSTACK Game teaches you to develop and create your own games, all through the power of code. It utilises an LED matrix to display your created games while also allowing you to learn how to program matrix displays. The BitSTACK Game also includes buttons to allow you to interact with the games that you make.

All of our products will be available to buy soon. Keep a look out on our store page and your inbox for further details about release dates.

Thank you once again for becoming a part of the BitSTACK family. We can't wait to share this experience with you all and see what incredible ideas you come up with!
